## Quibou A

Your section of nine Marines has three HMMWVs, each armed with an M240 machinegun.

The brigade has been fighting a mechanized enemy for the past three weeks. The nearest enemy is 30 kilometers north.

The terrain is European—rolling fields and farms, cut by streams and tree lines. Visibility is often less than 500 meters.

At 1700, your convoy commander stopped his 36-vehicle resupply convoy in **Quibou** to refuel. Your air escort went off-station, reporting, “no friendly or enemy units anywhere nearby.” The convoy security element launched a UAS to search north.

The convoy commander pointed at you and then his map: “SCREEN three kilometers of this road in order to protect our north-west flank. ‘Screen’ means ‘provide early warning,’ OK?”

Fifteen minutes later, after your three vehicles crossed the rise at the railroad tracks moving northwest and descended the road, you stop short. Straight ahead, you see one, then two, enemy four-wheeled armored cars moving toward you from the bridge, 500 meters away. They have not yet seen your vehicles.

Your driver looks over at you. “What are we going to do?”

# Which is a valid Mission Statement?

“BUY milk”

VS.

“SEIZE that hill”

# Which is a valid Mission Statement?

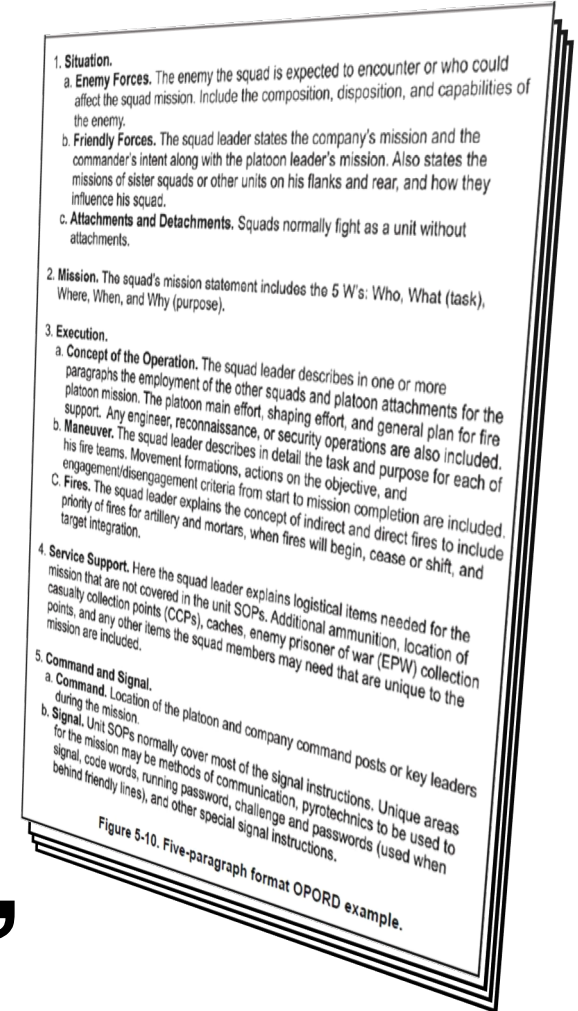

“BUY milk”

VS.

“SEIZE that hill”

Whole or 1%?  
Quart or gallon?  
Chocolate milk?  
If no milk?

Cereal?  
Guests?  
Kahlua?  
Egg nog?

# How do we make a Mission Statement better?

“BUY milk  
IOT make quiche”

“SEIZE that hill  
IOT control junction”

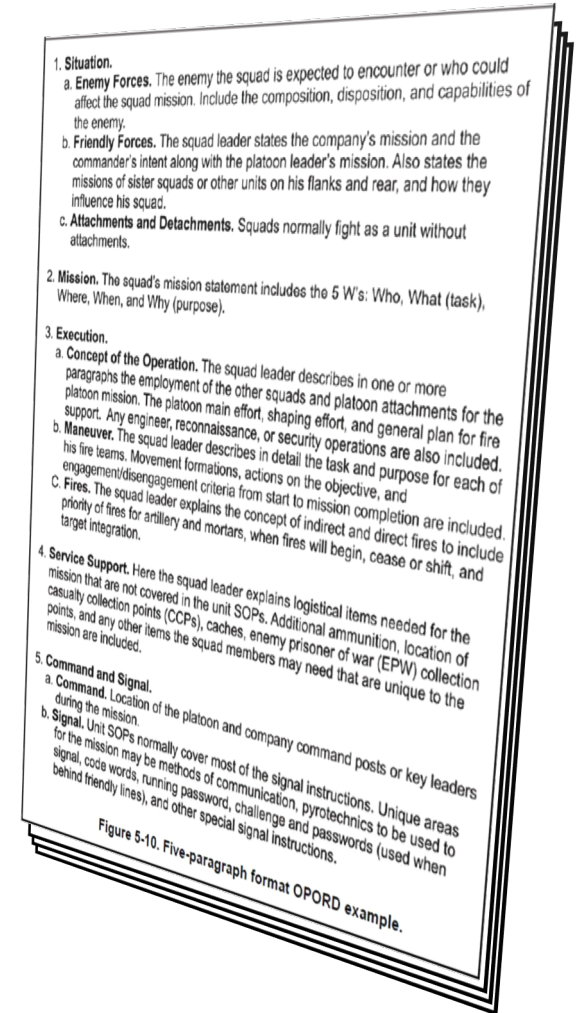

Figure 5-10. Five-paragraph format OPORD example.

# How do we make a Mission Statement better?

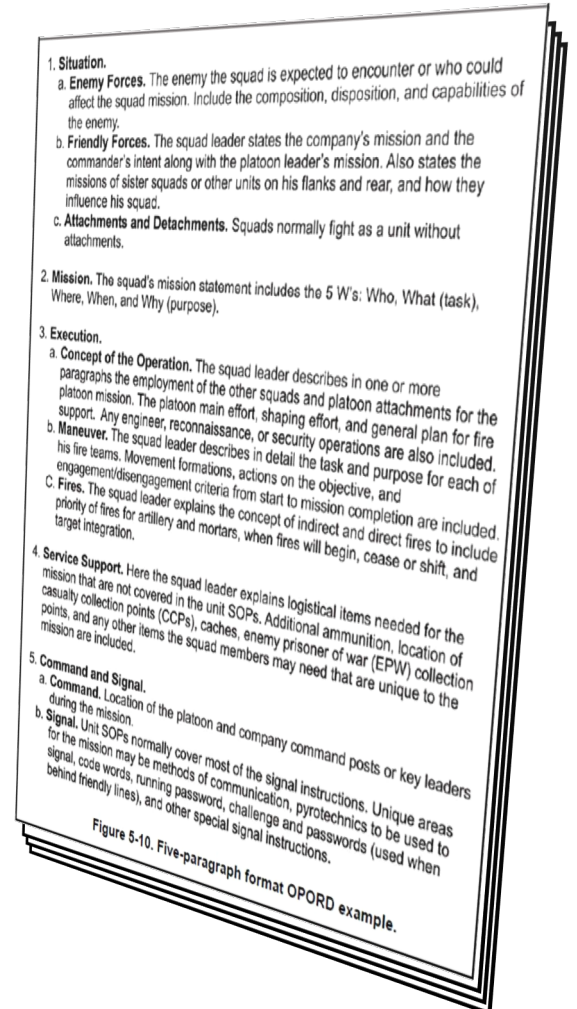

**task**  
“BUY milk  
IOT make quiche”

**purpose**

**task**  
“SEIZE that hill  
IOT control junction”

**purpose**

Whole or 1%?  
Quart or gallon?  
Chocolate milk?  
If no milk?

Cream!  
Cheese!  
No!  
Frozen quiche!

## Mission Statement Best Practices: **Every task needs a purpose**

- USE the in-order-to (IOT) format to link **task** with the **purpose**

A purpose gives your task **longevity** and **situation awareness**

A purpose enables **initiative** when situation **changes** or information is **incomplete**

**task** → **SEIZE Hill 205 IOT protect airfield.** ← **purpose**  
↓ ↓  
**SECURE route OHIO IOT safeguard aid convoys.**

- CONDENSE: **Each word** means something — Each extra word *reduces* understanding

The mission statement is the single most important sentence in the order

- CAPITALIZE the **task** — USE precise doctrinal **terms**

*Precision language is more important than precision weapons*

## Quibou B

The convoy commander pointed at you and then his map: “SCREEN three kilometers of this road in order to protect our north-west flank. ‘Screen’ means ‘provide early warning,’ OK?”

Two hours later, your vehicles are returning south to **Quibou**. You have seen no enemy. You and your Marines drove out for four kilometers, reported “all clear” at the turnaround point, and then drove back slowly, still studying both sides of the road. It is now dark, but there is a good moon.

At the bridge, travelling south, you tried to report your position, but the radio net is down. Off to your right, maybe 700 meters away, you can see the silhouettes of four friendly vehicles coming down the farm road toward you to link up with you on the main road.

Suddenly, your driver shouts, “Those aren’t friendly! Those are enemy BMPs! What do we do now?”

Quibou

## Best Practices: Mission Statement Task and Purpose

- ASK yourself, “Can you change the task and still maintain the purpose?”

***Do whatever it takes IOT prevent enemy withdrawal on Route 12.***

- AVOID equating the task and purpose: task  $\neq$  purpose

**DEFEND the village IOT retain the village.**

- AVOID multiple purposes—there should be NO “and” in the purpose

**KNOCK down the tree IOT block the road AND provide firewood.**

- AVOID a long-range purpose — your purpose should nest with the long-range purpose

**SEIZE Hill 424 IOT defeat ITALY.**

SEIZE Hill 424 IOT guard flank IOT secure beach IOT seize NAPLES IOT acquire airfield IOT defeat ITALY

## Best Practices: Tasks to Subordinate Units

- Your **task** to each subordinate is their **mission**
- WRITE one concise, single-sentence task for **each** subordinate
- WRITE each task just like a mission statement:  
USE the in-order-to (IOT) format to link **task** with **purpose**  
CONDENSE: **Each word** means something — Each extra word *reduces* understanding  
CAPITALIZE the **task** — USE precise doctrinal **terms**  
**1st Platoon. ME. At 1100 SEARCH GUBI village IOT uncover evidence of enemy**  
**2nd Platoon. At 1030 BLOCK streambed and bridge IOT prevent enemy escape**  
**3rd Platoon. At 1030, SECURE Hill 112 IOT overwatch GUBI village operation**
- ASSIGN a main effort

### Quibou C

The convoy commander pointed at you and then his map: "We have a report of possible enemy reconnaissance vehicles ten kilometers north. I need you to BLOCK the road here," — he draws a goose-egg on his map — "in order to protect our refueling operation. Bring a javelin missile team."

Forty minutes later, your Marines are set in position. You and your **Vehicle 1** machinegun will SUPPRESS the enemy when they pass target reference point (TRP) 01, the farm road intersection. **Vehicle 3** javelin, in the low ground of a draw, will fire missiles and destroy the enemy vehicles. **Vehicle 2** machinegun, with good visibility from a high point, will pursue the withdrawing enemy by fire.

Two hours after dark, **Vehicle 2** reports on the radio, "I seem them! Enemy vehicles slowly crossing the bridge."

Suddenly, **vehicle 3** interrupts. "There's enemy infantry in the woods! Two-hundred meters. They're coming straight at us! We have to pull back!"

## Common Errors with Tasks to Subordinate Units

- Issuing NO mission — Leader issues tasks, but NO collective mission:

**GO get dressed!**

**BUY cheese! BUY meat! BUY bread!**

- NOT designating a main effort
- NOT including a purpose with each task
- Issuing too many tasks
- Issuing “puppet orders” to control movement

**CROSS the bridge, MOVE north along the treeline, STOP outside the village**

task ≠ CONOPS

- Issuing “more-of-the-obvious” tasks

**“Do your job!”** Do NOT say “MOVE quietly... CHECK equipment... CARRY batteries...”

## Advanced Mission Statement Concepts

- There is **NO Commander's Intent paragraph** for companies, platoons, or squads  
In Marine Corps mission statements, the purpose *equals* the intent
- There is **NO Center of Gravity analysis** for companies, platoons, or squads  
COG Analysis is done by the MAGTF or the Joint Task Force
- There is **NO Marine Corps Planning Process** for companies, platoons, or squads  
MCPP applies to units with staffs—Small unit leaders make estimates and issue orders
- There are **NO Annexes** to OpOrders for companies, platoons, or squads  
MCWP 5-10 formats do NOT apply below the battalion level
- Although all of these are taught, **NONE** applies to Lieutenants, SNCOs, or NCOs

## Quibou D

The convoy commander pointed at you and then his map: “We have a report of possible enemy reconnaissance vehicles ten kilometers north. I need you to BLOCK the road here at the bridge,” — he draws a goose-egg on his map — “in order to protect our refueling operation. Bring a javelin missile team. Major Macgregor will go with you. He knows what to do.”

Twenty minutes later, your three vehicles are parked near the barns at the farm complex. Major Macgregor, an Army liaison officer who had hitched a ride with your convoy, says to you, “Wait here. I’m going to walk down to the bridge and reconnoiter the area.”

After you have waited thirty minutes, and Major Macgregor has NOT returned, the convoy commander calls from Quibou. “Why are you NOT in position yet? It’s almost dark!”

You have no communications with Major Macgregor. What orders do you issue?

Quibou
